EDUCATION

University of Central Florida
Bachelor of Science in Computer Science

Orlando, FL
Expected August 2027

EXPERIENCE

Freelance Web Developer 2026 – Present
Independent Contractor — HTML, CSS, JavaScript, Tailwind CSS attilahandyman.com

- Designed and developed a production one-page website for a local handyman business, translating client requirements into a responsive user experience from design through deployment.
- Implemented responsive navigation, service sections, an interactive gallery and lightbox, contact CTAs, a QR-code contact flow, and an embedded service-area map using **HTML**, **CSS**, **JavaScript**, and **Tailwind CSS**.
- Deploy and maintain the production site, troubleshooting issues and implementing content and functionality updates based on client feedback.

PROJECTS

Magic Collectors Card Game | *MongoDB, Express.js, React, React Native, Node.js, Typescript*

- * Collaborated on a team to develop a full-stack Magic: The Gathering application with interconnected web and iOS/Android clients using the **MERN stack** and **React Native**.
- * Developed the mobile application's frontend for iOS and Android, implementing interactive features including card opening and collection management.
- * Developed frontend components for the web application and integrated user-facing features with **REST APIs**.
- * Used **Git** and **GitHub** for version control and team collaboration across web and mobile development.

AI Parking Occupancy Detection System | *Python, Flask, JavaScript, YOLOv11, OpenCV*

- * Built a web application that analyzes live video streams for real-time parking occupancy detection using **YOLOv11**.
- * Developed a **Flask** backend to process video frames and return detection results to a lightweight frontend for real-time visual feedback.
- * Mapped irregular parking lot layouts by defining custom parking zones and applying **OpenCV** annotations to detection results.

FocusForge - AI-Powered Chrome Extension | *JavaScript, CSS, HTML, Google Gemini*

- * Built a **Manifest V3** Chrome extension with customizable Pomodoro timers running in a **service worker**, preserving state across browser restarts.
- * Integrated the **Google Gemini API** to analyze post-session reflections and generate personalized productivity recommendations.
- * Implemented persistent session tracking and structured the codebase for future React-based UI and analytics features.

The One - Contact Manager Web Application | *JavaScript, HTML, CSS, LAMP*

- * Collaborated in a three-person team to develop a full-stack contact manager using the **LAMP stack**.
- * Developed frontend functionality in **JavaScript**, implementing application logic, interactive features, and user workflows.
- * Developed responsive, accessible interfaces using **HTML**, **CSS**, and **JavaScript**.

TECHNICAL SKILLS

Languages: C++, C, Java, Python, JavaScript, Typescript, Lua, SQL, HTML, CSS

Frameworks and Libraries: React, React Native, Node.js, Express.js, Flask, Tailwind CSS, OpenCV, YOLOv11

Databases and Technologies: MySQL, MongoDB, REST APIs, LAMP, MERN, Unreal Engine

Developer Tools: Git, GitHub, CMake, Valgrind, VS Code, IntelliJ IDEA, Figma, WSL
